This game doesn't work.

At all.

There is nothing to do at the main screen but click "play game" and have it say you can't... Plus there's no exit button, no options menu, etc. You have to Alt-F4 out.

[Literally the game doesn't work.](#)

[Plus it auto-opens my SteamVR interface?](#)

[This is the same guy that wrote ARK: Eternal mod called "Ark Comes Alive" and left it broken while he accepted donations for years. I guess he's up to his old tricks. He's a big one on starting a project, then leaving it incomplete.](#)

[DO NOT BUY THIS GAME!](#)

[EDIT: I left some comments on his discussions on Steam to people asking questions about this game that literally doesn't work. He deleted them. So, really... be careful about buying ANYTHING from this developer.](#)

[That's just one of many times he deleted my comments so people don't know his game doesn't work. AVOID THIS DEVELOPER. Look at his responses to other reviews.](#)
