It includes over 70 new species (which do not need to be kept in a zoo) of animals to be raised and cared for. The player can either keep the animals in their natural habitats or in a zoo in the style of the previous expansion pack, Adopt an Exotic.

Contents The American alligator makes its appearance on the map for the first time. There is also a new "soft" key under the inventory menu called "American Alligator". Jaguar, Tiger, Sea Otter, and Sea Turtle have the same initial habitats as the Lion and Elephant, making them hybrids and not full-blooded native American species. They are only available after completing the Adopt an Exotic, the expansion pack that adds them, as they do not appear at all in the Zoo Tycoon 2: African Adventure expansion pack. This expansion pack has the ability to house an unlimited number of new animal species on the map in an effort to challenge the Animal Collection limit of 64. However, only seven species are available for purchase through the zoo shop, and only ten of these species can be acquired after "Adopt an Exotic". Primates are the only animals that cannot be made extinct. Therefore, the "Primate" category on the "Exterminate" button is present for these animals, but not functional. Exterminate for a species will not work until at least one of them is extinct. Animals in the "Primate" category are vulnerable to one of the Fertility Edicts and are vulnerable to attacks, just like any other species. They will all eventually leave, with the exception of the Mona Monkey, as they can never die in the wild (and are thus always a captive species in Zoo Tycoon). This expansion pack includes new items, abilities, and animals that have been designed for this version of the game and not the original version. These include: Standard Animal Cages - New cages for zoo keepers to use. These come with a high fence design and lockable doors. Food Cans - Canisters containing zoo animals' food. Rest Rooms - Small spaces that permit zoo keepers to escape the sun and cool down. New Animals - Animals not present in the original game but included in the expansion pack. They include a Chinchilla, Hog, White-Tailed Skunk, Kangaroo, Kangaroo Hybrid, Koala, and many more. Animals to create - Animals not included in 82157476af
